FROM IDEA TO ACTION:

REAL TOOLS FOR YOUTH ENTREPRENEURSHIP

The ITG Business Incubator and open educational resources boost new opportunities for young entrepreneurs.

The ITG – InTechGrowth project takes a decisive step toward action with the creation of a digital business incubator designed specifically for young entrepreneurs. After analyzing real needs through national research, the project has developed a practical tool that allows young people to transform their ideas into concrete, sustainable, and future-oriented initiatives.

The ITG Incubator is not just a digital platform: it is a comprehensive entrepreneurship support ecosystem. Through it, users can access structured content, step-by-step guidance, and resources tailored to the different stages of business project development.

One of the most outstanding elements is the availability of educational materials in five languages, guaranteeing accessibility and inclusion for young people from diverse backgrounds. This content covers everything from basic competencies to more advanced aspects related to innovation, digitalization, and business management.

Additionally, the project has developed a series of visual infographics that make it easier to understand key concepts, rendering the learning process more dynamic, intuitive, and engaging.

This entire ecosystem has been designed with a clear goal: to lower the barriers to entry for entrepreneurship and offer young people concrete tools to build their own professional future.
